

DOMO 1-1

Code: K611

Description

One-tower playground set featuring a snail-inspired design with an arched openwork roof. It includes a straight slide, a bridge with hanging chains and circular steps made of HDPE board called "raindrops," an entrance ramp with round grips, a rope, and arched handrails, a climbing wall made up of four flexible rings hanging on a chain, a triangular climbing wall, and a climbing wall with round openings. The construction is made of high-quality, weather-resistant stainless steel and is welded (clamps are not used). The structural pipes (including four bent ones) are finished with spherical decorative elements resembling snail antennae. The slide walls, climbing wall, roof, and round features are made of HDPE board, and the floor is made of HPL board with an anti-slip texture to ensure safety and prevent overheating in the sun and easy freezing in winter. We take safety seriously, and that's why our playground set complies with EN 1176 norm, ensuring that children can play safely and securely.

* All stainless steel Limako products are available in galvanized and powder painted version.

Playground device consists of

- 7 x structural tubes finished with spherical decorative elements that resemble snail antennae,
- 1 x tower with an openwork arched roof
- 1 x straight slide made of stainless steel
- 1 x entrance trap with round grips, a rope, and curved stainless steel handrails
- 1 x vertical climbing wall made of HDPE board with round holes
- 1 x climbing structure consisting of 4 rings made of HDPE board, suspended on chains attached to two curved tubes
- 1 x triangle-shaped ladder and climbing structure
- 1 x bridge with hanging chains, on which there are round steps made of HDPE board called "raindrops"
- 1 x square platform with an anti-slip texture

Product details

- Dimensions: 4,39 x 6,26 x 3,73m
- Safety area: 9,80 x 7,39 m
- Age: above 6 years
- Freefall height: 2,5 m
- The height of the platform: 1,5 m
- A certificate confirming compatibility with norm EN 1176

Materials

- Structure and additional elements (handrails, handles, brackets, etc.) are made of stainless steel AISI 304
- Pipe diameter 76.1 x 2.0mm (including two bent pipes), 33.7 x 2.0mm and 25.0 x 2.0mm
- Profiles: 40 x 40 x 2.0 mm
- 10mm thick HPL platform with non-slip texture
- The sides of the slide, tower and balustrades are made of 15 mm thick, 3 layers coloured HDPE plastic
