Code: K612-I

Description

An integrated set with vibrant colors consisting of two towers, with slides, a tube-shaped climbing structure with a rope, bridges, an entrance ramp with a rope, ladders, a pioneer, a sensory board with two colorful drums that produce maraca sounds, a sensory board with five tubular chimes that produce sound, a sensory board with a rotating wheel that produces rain sounds, a sensory board with sliding elements, an abacus, and a sandbox. The set has a snail-like design aesthetic. The construction is made of stainless steel, resistant to weather conditions and heavy use, with welded construction (the use of staples is not allowed). The structural pipes (including four bent pipes) are finished with spherical decorative elements resembling snail antennae. The slide walls, entrance ramp, and round elements are made of HDPE sheet. The floor is made of HPL with an anti-slip texture, ensuring user safety and preventing overheating in the sun and easy freezing in winter. The roof, entrance ramp, slide sides, and climbing wall are made of three-layer, colored HDPE with a thickness of at least 15 mm.
